

# Nuance<sup>®</sup> Dragon Medical One

## A new fast & smooth documentation workflow

Dragon Medical One is a **high-calibre medical speech recognition solution** that helps clinicians **cope with the administrative burden**. It empowers them to create comprehensive clinical documentation **more efficiently** using just their voice.

Voice-based entry of patient records, notes, and prescriptions using Dragon Medical One has proven to be **three times faster than typing** and supports **improved documentation quality and clinician satisfaction**.

Dragon also helps **simplify repetitive tasks**: With predefined **templates, intuitive voice commands**, and **seamless automatic formatting**, clinical documentation becomes a smooth and easy process.

Dragon Medical One is **approved by Te Whatu Ora** and has been **used in numerous hospitals and practices** across New Zealand and Australia for years.

It is cloud-based, hosted on Microsoft Azure data centres in Australia using 256-bit encryption and is **compliant with the NZ Privacy Act**.

## Free trial & demo

Find out how you can streamline your documentation workflow and free up time for more important things: Visit [soundbusiness.co.nz/medical](https://soundbusiness.co.nz/medical) for a personal demo and a free trial of Dragon Medical One speech recognition or feel free to contact **Simonne Wyatt** directly.
