

Nuance[®] Dragon Medical One

Clinical speech recognition for Nookal

Dictate clinical treatment notes directly into **your Nookal Practice Management System** and complete clinical documentation 3x faster.

Dragon Medical One is a **high-calibre medical speech recognition solution** that helps clinicians create comprehensive clinical documentation **more efficiently** using just their voice.

Dragon also helps **simplify repetitive tasks**: With predefined **templates, intuitive voice commands, and seamless automatic formatting**, clinical documentation becomes a smooth and easy process.

Voice-based entry of patient records, notes, and prescriptions using Dragon Medical One also supports **improved documentation quality and clinician satisfaction**.

Dragon Medical One has been **used in numerous hospitals and practices** across Australia and New Zealand for years. It is cloud-based, hosted on Microsoft Azure data centres in Australia using 256-bit encryption and is **compliant with the AU Privacy Act and the NZ Privacy Act & NZ Health Information Privacy Code**.

Free trial & demo

Find out how you can streamline your documentation workflow and free up time for more important things:

Visit soundbusiness.co.nz/nookal for a personal demo and a free trial of Dragon Medical One speech recognition or feel free to contact **Mark Larbey** directly.
