

PowerMic Mobile

Installation

Before you start, make sure of the following:

- You have downloaded PowerMic Mobile from the Apple App Store (iPhone and iPad) or Google Play (Android devices).

- Your system administrator has sent you a configuration URL to set up your organization's profile in PowerMic Mobile. You must be able to access the configuration URL from your mobile device.

Configuring PowerMic Mobile

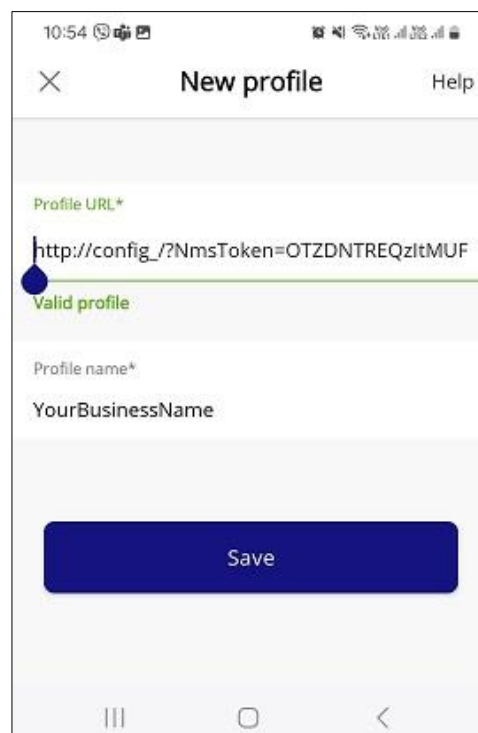

To set up PowerMic Mobile for use with your desktop speech recognition application, follow these steps:

1. On your mobile device, open the email where your system administrator provided your configuration link.
2. Tap the configuration URL. When your device asks you which app to use to open the link, select **PowerMic Mobile**.
3. When prompted, accept the end user license agreement, and allow access to the microphone. PowerMic Mobile will be configured and ready to use.

Copying and pasting the URL

If you have trouble opening the configuration URL you can also copy and paste the link. Proceed as follows:

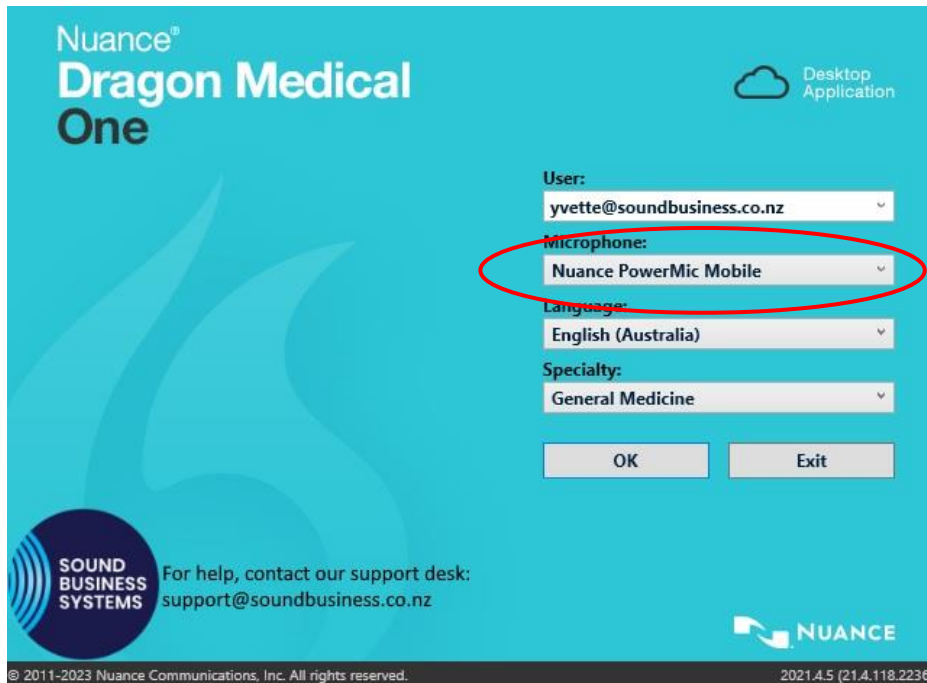

1. On your mobile device, open the email or web page where your system administrator provided your configuration URL.
2. Copy your configuration URL to the clipboard.
3. Start PowerMic Mobile and tap **Add profile**.
4. Paste the configuration link you copied in step 2, enter a name for the profile, and tap **Save**.

Logging into PowerMic Mobile

Once you have successfully created your profile open your Dragon voice recognition software on your computer and **Sign In**.

Under the **Microphone:** drop down selection box choose **Nuance PowerMic Mobile**.

Once successfully signed in you will see the Dragon toolbar appear on screen in the waiting to pair state.

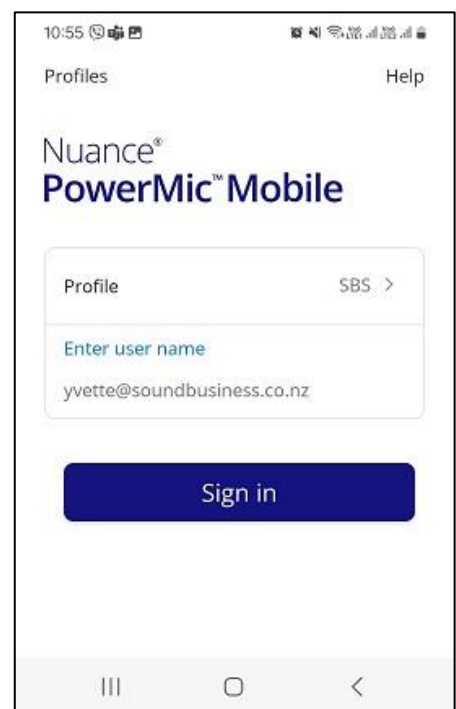

Return to PowerMic mobile on your mobile device and press **Sign In**.

Dragon will connect and the microphone screen will appear.

The Dragon toolbar is now waiting to record.

Press the **Microphone**  when you are ready to start dictation. The button indicates that recording is active: 

Press the Microphone icon again as soon as you are finished.

Note: *It is important to remember that every interaction with Dragon is building your unique voice profile. Be sure to stop recording when you are no longer dictating. Interruptions and background noise can be heard.*

You can only start and stop recording via your mobile device. The PowerMic Mobile icon in your desktop application indicates if recording is on  or off  but does not start or stop recording.

Further information

- You only need to enter the configuration link once for each of your organizations. If there is a configuration link already saved on your device, you will go straight to the login screen.
- You can use external audio devices, including Bluetooth and wired headsets and earbuds.
- You can use the play/pause function on your wired device to turn the microphone on and off.
- You can add more profiles via the **Sign in** screen.
- If you have set up multiple profiles, select one from the drop-down list when you log in.
